# Potato cuttings

## Potato cuttings

Raw potato chips are cut potatoes that have been removed from the production process before baking for reasons such as length, color and thickness. The starch in this product has the properties of a raw potato and is therefore poorly digestible for pigs. For cattle, on the other hand, it is excellently suited due to the high resistance of the starch. The product has a constant composition and contributes to the taste of the ration.

## Quality

The product complies with laws and regulations. Mycotoxins, insecticides, pesticides and herbicides are tested according to the GMP+ FSA. The product is non-GMO (according to Regulation (EC) 1829/2003 and 1830/2003).

### Cattle values

DVE	83
OEB	-57
VEM	1124
VEVI	1242

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

### Feeding advice based on DS of total ration

Dairy cattle	max 5-10 kg bis product in ration
Beef cattle	max 1,5 kg product / 100 kg body weight

### Logistics & Storage

Transport	Bulk with walking floor, tipper or container truck
Storage	Bunker or silage
Shelf life	2 to 6 months, ensilage 1 year
Nipple worthy	No
Extra Comment	Upon request p/ton
