Lecifeed® Classic

The product Lecifeed® is a mixture of soybean lecithin with free fatty acids. The high energy content and emulsifying effect of lecithin promotes fat digestion and results in increased growth and fat deposits. The naturally present choline is used more efficiently in the animal, so a lower content of choline chloride can be used in the feed formulation. In addition, Lecifeed® has functional properties such as an anti-oxidative and preservative effect to promote overall animal health. The product complies with laws and regulations. Mycotoxins, insecticides, pesticides and herbicides are tested according to the GMP+ FSA. The product is GMO (according to Regulation (EC) 1829/2003 and 1830/2003).

Valid from 13 September 2021
