Strooi pellet bulk

Strooi pellet Bulk is made from organic co-products from the cereal and fibre processing industry, namely: spelt husks, hemp fibres, cereal residues and flax loams. Strooi Stable Litter is available in a pelleted or crushed form, depending on the form of application. Bentonite can also be added, which has a disinfecting effect. This makes the product suitable for poultry, turkey and cattle farming.

Due to the relatively high gas yield, applications (after use) towards fermentation plants are also interesting. As bedding, Hay has a positive influence on the barn climate and hygiene. The product should be stored dry and can be supplied in both big bags and bulk.

Valid from 13 September 2021

Downloaded on 08 May 2026

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.
