

Livestock

Potato fibers High protein

Potato fibers High protein

is produced during the processing of potato starch out of starch potatoes. The potato fibers out of the process are a combination of grinded peels, cell walls and other starch parts.

Potato fibers is a high quality liquid feed ingredient for ruminants with a high energy level, high in resistant starch and a constant quality. This product is protein-rich and stimulates milk protein content. The product is also suitable to substitute concentrate or as a cover for pits and stackable co-products.

Quality

The product complies with laws and regulations. Mycotoxins, insecticides, pesticides and herbicides are tested according to the GMP+ FSA. The product is non-GMO (according to Regulation (EC) 1829/2003 and 1830/2003).
