Ruval Plus

Bijproduct Ruval Plus

Ruval Plus

Ruval Plus is a by-product from the processing of sugar beets. Ruval Plus is a protein-rich and palatable liquid supplementary feedstuff that can be used as an alternative for soya and rape meal. Ruval has a preservative effect and contains nutrients that stimulate rumen fermentation and promote animal health. Ruval ensures a higher feed intake due to, among other things, the proportion of citric acid and a better mixing of the ration. In addition, Ruval contains natural betaine and glutamic acid.

Quality

The product complies with laws and regulations. Mycotoxins, insecticides, pesticides and herbicides are tested according to the GMP+ FSA. The product is non-GMO (according to Regulation (EC) 1829/2003 and 1830/2003).
