Kieselgur

Kieselgur, or diatomaceous earth, is a residual flow from the filtration process during the production of beer. Kieselgur is an organogenic sediment that consists for the most part of the skeletons of single-celled diatoms or diatoms.

Valid from 28 July 2022

Downloaded on 24 June 2026

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.
