Export Manure Stab resistant

Export Manure Stab resistant is a high quality organic fertilizer derived from livestock production. The product is hygienized before it becomes exportable. Hygienizing the manure means that the organic manure undergoes a heat treatment of at least 70°C, for the duration of at least one hour. This product undergoes a separation process either before or after the hygienization process, which gives it a solid form. It is then marketed under the name Export Manure Stab resistant and is available in different content compositions (depending on origin).

Valid from 28 July 2022

Downloaded on 08 May 2026

DM	25.0
Ash	90
Phosphor (P)	8.0 - 15.0
Nitrogen (N)	12 - 18
Potassium (K)	13.0

Biogas yield	90
Methane %	60

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

Logistics & Storage

Transport	Bulk with walking floor, tipper or container truck
Storage	Bunker
