# Export Manure Stab resistant

Export Manure Stab resistant is a high quality organic fertilizer derived from livestock production. The product is hygienized before it becomes exportable. Hygienizing the manure means that the organic manure undergoes a heat treatment of at least 70°C, for the duration of at least one hour. This product undergoes a separation process either before or after the hygienization process, which gives it a solid form. It is then marketed under the name Export Manure Stab resistant and is available in different content compositions (depending on origin).

**Valid from 28 July 2022**

Downloaded on 24 June 2026

DM	25.0
Ash	90
Phosphor (P)	8.0 - 15.0
Nitrogen (N)	12 - 18
Potassium (K)	13.0

Biogas yield	90
Methane %	60

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

## Logistics & Storage

Transport	Bulk with walking floor, tipper or container truck
Storage	Bunker
