Export Digestate solid

Export Digestate is a high-quality organic fertiliser from the co-fermenter. The product is hygienised before it becomes exportable. Hygienising the digestate means it undergoes a heat treatment of at least 70°C for a period of at least one hour. The digestate then undergoes a separation process and is given a solid form as a result. It is marketed under the name Export Digestate Solid and is available in different content compositions (depending on origin).

Valid from 28 July 2022

Downloaded on 15 December 2025

Phosphor (P)	8.0 - 15.0
Nitrogen (N)	12 - 18
Potassium (K)	13.0

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

Logistics & Storage

Transport	Bulk with walking floor, tipper or container truck
Storage	Bunker
