

Renewables

Cocoa Shells

Cocoa Shells for Renewables is the co-product that is released in chocolate factories during the chocolate production process. They are removed when cocoa beans are being processed into chocolate. Once the beans have been fermented and dried, the shells are mechanically removed to gain access to the cocoa bean.

Valid from 08 June 2023

Downloaded on 02 February 2026

DM	90.0
Ash	7

Biogas yield	380
Methane %	55

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

Logistics & Storage

Transport	Unloaded with walking floor, tipper or container truck
Storage	Bunker
