

Renewables

Pre-baked Chips Bergia

Pre-baked Chips Bergia for Renewables is produced when potatoes are processed into chips and other potato specialities. The co-product becomes available at the start and end of production lines, as well as at sorting once the fries have been cooked. The starch is solubilised due to the production process already undergone, therefore making it suitable for use in Renewables.

Valid from 08 June 2023

Downloaded on 02 August 2025

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.
