Wheat starch Crespovit® Starch

Wheat Starch Crespovit® Starch is a plant-based liquid animal feed that is released during the processing of wheat flour into wheat starch for human and technical application. During the process, the flour is washed, whereby a separation takes place between the starch fractions and the wheat gluten. A co-product that is released during this process is Wheat Starch Crespovit® Starch, which contains a high proportion of starch and is marketed as a liquid feed ingredient.

Quality

The product complies with laws and regulations. Mycotoxins, insecticides, pesticides and herbicides are tested according to the GMP+ FSA. The product is non-GMO (according to Regulation (EC) 1829/2003 and 1830/2003).
