# FH-Permeate

FH-Permeate is released by ultrafiltration (membrane passage) of whey during the production of cream cheese and cheese that is partially desugared and thickened. FH-Permeate is pasteurized and contains a high content of lactic acid. This increases the feed value, is tasty and promotes intestinal health. The product complies with laws and regulations. Mycotoxins, insecticides, pesticides and herbicides are tested according to the GMP+ FSA. The product is non-GMO (according to Regulation (EC) 1829/2003 and 1830/2003).
