

Livestock

Potato peelings for cover silage

Potato peelings for silage coverage are created when peeling potatoes by means of a peeling brush bath. After peeling, a product is created consisting of peel and part of the starch available under the peel. In addition to the starch content, this product also contains a high crude fiber which benefits the health of cattle. It has a long shelf life.

Quality

The product complies with laws and regulations. Mycotoxins, insecticides, pesticides and herbicides are tested according to the GMP+ FSA. The product is non-GMO (according to Regulation (EC) 1829/2003 and 1830/2003).

Valid from 15 February 2023

Downloaded on 08 May 2026

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

Feeding advice based on DS of total ration

Logistics & Storage
